DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because Figures 3, 4, and 5 are dark and unclear. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 9 June 2004 has been considered by the examiner. However, portions of the IDS fail to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each publication listed. The Office has not received a copy of several of the non-patent literature documents listed on the IDS. These documents have been crossed out in the IDS and not considered by the examiner.

Allowable Subject Matter

4. Claims 1-12 are allowed.
5. The following is an examiner's statement of reasons for allowance: the art of record, considered alone or in combination, does not anticipate nor render obvious the claimed invention of a jet spouted fluidized bed dryer for drying a slurry of biomaterials comprising a hot gas inlet means, a lower conical member with a screen adjacent the hot gas inlet means, an upper conical member coaxial with the lower conical member having a hot gas outlet means and a conical screen having a wide upper end and a lower closed end surrounding the hot gas outlet, inert carrier members contained inside the conical members, and an inlet port for the slurry of biomaterials; wherein the lower conical member, the upper conical member, and the conical screen are arranged along the same vertical axis and have cone angles; the screens are constructed and arranged to keep the inert carrier particles from escaping the conical members; and hot high velocity gas enters through the hot gas inlet, passes through the conical members and screens drying the slurry of biomaterials therein, and exits through the hot gas outlet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathryn S. O'Malley whose telephone number is (571)272-4879. The examiner can normally be reached on M-F (9:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira Lazarus can be reached on (703)308-1935. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
